Software Architect

Software Architect

Location: Flexible, UK

Job Type: Full-time

Benefits: Attractive salary, company car or car allowance, PMI, 25 days holiday + Bank Holidays, rising with service, tax free childcare, cycle to work scheme, paid volunteer days, flexible working

About Us

Logistex is a leading provider of innovative software solutions for the automated warehouse and supply chain industry. We have recently won our largest order to date with a highly regarded customer, further solidifying our position as an industry leader. As an Employee-Owned Trust (EOT), we are committed to ensuring that our employees have a direct stake in the company's success and future growth.

The Role

We are looking for a talented Software Architect to join our dynamic and expanding team. This is a pivotal role, where you will take the lead in designing and delivering software solutions that will shape the future of warehouse automation. Whether you're an experienced Software Architect or an experienced Software Engineer looking to take the next step in your career, this role provides the perfect opportunity to grow within a highly innovative and supportive environment.

Key Responsibilities

- Lead the architectural design of complex software solutions for large-scale warehouse automation projects.
- Collaborate with cross-functional teams, including developers, product managers, and clients, to define software requirements and ensure successful delivery.
- Develop and maintain architectural blueprints, ensuring scalability, security, and performance standards are met.
- Oversee the technical direction of multiple software projects, providing mentorship to development teams.
- Ensure adherence to best practices in software development, including code quality, testing, and deployment strategies.
- Engage in solution design and technical discussions with key stakeholders, ensuring alignment with client expectations and company goals.

Skills & Experience

- Proven experience as a Software Architect or a senior-level Software Engineer with a strong desire to move into an architectural role.
- Extensive experience in software design and development, preferably in the logistics, supply chain, or automation sectors.
- Strong proficiency in modern programming languages (e.g., C++, Java,) and software development frameworks.
- Excellent understanding of system architecture
- Strong problem-solving skills and the ability to analyse complex systems and processes.
- Exceptional communication skills, with the ability to engage both technical and non-technical stakeholders.
- Experience working within Agile development environments is highly desirable.

What We Offer

- **Career Development:** This role provides the perfect pathway for senior engineers seeking to step up into an architectural role, with clear progression opportunities.
- **Exciting Projects:** Work on cutting-edge software solutions, including our largest project to date with a highly respected client.
- **Supportive Team Environment:** Join a collaborative, innovative, and employee-focused team that values creativity and technical excellence.
- **Competitive Salary & Benefits Package**

How to Apply

Apply now with your CV and cover letter to careers@logistex.com

Logistex is an **Equal Opportunities Employer**, committed to fostering an inclusive, diverse workplace where all individuals are valued and treated with respect. We welcome applicants from all backgrounds, believing that diversity drives innovation.
