IMPROVE PRODUCTIVITY WITH CRANE UPGRADES FROM LOGISTEX

All the advantages of a new installation, but at a fraction of the cost

- ✓ Improve productivity with faster, more efficient components
- ✓ Get access to spare parts and service support with ease
- ✓ Extensive experience of delivering refurbishment & upgrades into live environment
- ✓ Full system or partial crane upgrades
- ✓ Project Management minimises disruption

CASE STUDY: WINCANTON

Logistex upgraded the Automated Storage and Retrieval System, originally installed by a different supplier, at Wincanton GSK's Distribution Centre at Brockworth.

Key Features:

- Software & equipment based on latest generation technologies
- ASRS cranes can operate in automatic or semi-automatic mode
- New control system with timer & diagnostics
- Interlock key access system
- Light guard protection

Achievements:

- Improved safety
- More flexibility
- Faster, more responsive and safer maintenance and repair
- Reduced energy costs
- Improved reliability

“
The new system has not only enhanced the centre's efficiency, but it is also providing a platform for continual improvement of the working environment for employees.
”

Contract General Manager,
Wincanton
