

Logistex provide automated materials handling and software (WMS) solutions for warehousing operations and we are currently seeking a

CAD ENGINEER

Location: Kettering

Position Type: Permanent

Are you an expert in CAD software like AutoCAD, SolidWorks, or Inventor?

Have you designed material handling systems and created technical drawings from first principles?

Why join us?

- Competitive salary
- Hybrid working flexibility
- Career development and training opportunities
- Member of an Employee-owned trust
- Work on high-impact automation and software projects
- Supportive and collaborative team culture

What will you be doing?

- Support the Solution Design Team with project development
- Lead the preparation of technical solution drawings and equipment applications
- Stay up to date with technical developments and apply current technologies
- Collaborate with Solutions and Engineering teams to refine designs
- Ensure all drawings meet industry standards and company guidelines
- Manage drawing files, version control, and component libraries
- Mentor junior Solution Engineers in systems design and specification

What do we need from you?

- Bachelor's degree or 5+ years in material handling system design
- Expert in CAD software (AutoCAD, SolidWorks, Inventor, or similar)
- Strong understanding of material handling processes and tolerances
- Ability to create concept designs and precise technical drawings
- Excellent problem-solving and attention to detail
- Strong communication and collaboration skills
- Ability to manage multiple projects independently
- Knowledge of structural analysis and load calculations

Apply now to join Logistex as a **CAD Engineer** and make a lasting impact!
