

Logistex provide automated materials handling and software (WMS) solutions for warehousing operations and we are currently seeking a

# *Graduate Software Engineer, Kettering/Hybrid*

**Location:** Kettering/ Hybrid

**Position Type:** Permanent

Are you a recent graduate looking to kickstart your career in software engineering within a forward-thinking, innovative company?

Do you have a foundation in C/C++ and Java, and a passion for problem-solving?

If YES, you could be the **Graduate Software Engineer** we're looking for!

## **What is your focus as a Graduate Software Engineer?**

You will play a key role in designing, testing, and implementing high-quality software solutions that support our cutting-edge automated systems. Working closely with a skilled and supportive team, you will gain hands-on experience developing software.

## **What are the benefits of a Graduate Software Engineer?**

- Competitive graduate salary
- Based in Kettering, Northants, with hybrid working options
- Clear progression path and tailored career development opportunities
- Become a member of an Employee-Owned Trust
- Cycle to work scheme
- Option to purchase additional annual leave
- Private medical insurance options

## **What are your key responsibilities?**

- Support the development and maintenance of software applications that control automated warehouse systems
- Collaborate with experienced engineers, project managers, and clients to develop solutions tailored to real-world challenges
- Assist in integrating software with hardware and control systems
- Participate in testing and debugging to ensure optimal performance and reliability

## **What are we looking for?**

- Some experience or strong interest in C/C++ and Java
- Familiarity with Linux/Unix-based systems and shell scripting
- An eagerness to learn and a proactive, problem-solving mindset
- Bonus: Exposure to warehouse management systems (WMS) or automation technologies
