

Logistex provide automated materials handling and software (WMS) solutions for warehousing operations and we are currently seeking a

Site Manager – Yusen, Northampton

Location: Yusen, Northampton

Position Type: Permanent

Are you an experienced leader with a passion for engineering excellence and customer service? Do you have a strong background in site maintenance management and a drive to deliver continuous improvement?

If YES, you could be the **Site Manager** we're looking for to lead our team at Yusen!

What is your focus as a Site Manager?

You will be responsible for managing the maintenance operation at the Yusen site, ensuring all service agreement commitments are met while maintaining a strong health and safety culture. You will lead and develop the on-site engineering team in line with our company values, foster strong customer relationships, and drive continuous operational and system improvements.

What are the benefits of being a Site Manager?

- Competitive salary with bonus opportunities
- Vehicle allowance
- Employee-owned company
- Opportunities for career development and leadership training
- Cycle to work scheme
- Option to purchase additional annual leave
- Private medical insurance options

What are your key responsibilities?

- Manage site maintenance operations, ensuring performance meets or exceeds contractual commitments
- Develop and maintain a culture of continuous improvement across the site team
- Enhance and uphold a strong Health & Safety culture
- Build and maintain strong working relationships with the customer's management and leadership teams
- Use Reflex, Analytex, and 3rd party software to analyse data, drive improvements, and report performance
- Lead the site team by example, ensuring high engagement and professional development
- Plan and schedule work packages to maintain high system availability
- Liaise with internal teams and manage 3rd party supplier relationships effectively
- Take ownership of initiatives to eliminate poor processes and system non-conformities

What are we looking for?

- Degree, HND, HNC or equivalent in an engineering discipline
- At least 5 years of leadership or supervisory experience in a technical environment
- Strong background in automation, warehouse management systems, and data analysis
- Skilled in using CMMS systems such as Service Geeni
- Competent Microsoft 365 user

Apply now to lead our Yusen site team and be part of a company shaping the future of automated logistics!
